Nolhan Mas

Lyon, France | +33 6 59 28 63 80 | masnolhan@gmail.com | LinkedIn | GitHub

Involved and curious student looking for a 4-to-5-month internship in contact with the financial markets.

EDUCATION

Université Lumière Lyon 2 — **Lyon, France**
MBFA Master's degree (Banking and Market Finance specialty) — 2026 – 2028

- Courses taken: Financial Markets, Financial Products & Pricing Methods, Risk Management, Financial Mathematics, Econometrics, Python & SQL, Asset Management, Bonds & Equity.

IAE Lyon, Université Jean Moulin Lyon 3 — **Lyon, France**
Bachelor's degree in Management (specialisation in Finance) — 2023 – 2026

- Courses taken: Financial Markets, Auditing, Banking, Matrices and Applications, Probability, Econometrics, Monetary Economics, Macroeconomics.

PROFESSIONAL EXPERIENCE

UNIVEO — **Lyon**, **France**
Financial Analyst Intern — 05/2026 – 07/2026

- Developed forecast and actual margin indicators (profitability analysis) on a portfolio of 149 multi-year deals, detecting an 80K€ cost drift and triggering a price renegotiation.
- Designed a customer receivable monitoring tool in Sage BI Reporting on a portfolio of 150 customers, shortening the detection time of unpaid invoices (late-payment risk) and contributing to a DSO reduction of about 7 days.
- Built a management reporting dashboard (data analysis) covering turnover, EBITDA, margin, WCR, CAF and conversion rate, with quarterly comparison over 3 years.

THE AUTOMATIC BARRIER — **Limonest**, **France**
Financial Operations Assistant Intern — 05/2025 – 08/2025

- Supported the finance department of 4 subsidiaries (cumulative turnover: €55 million), focusing on customer invoicing and receivables monitoring.
- Managed 200+ customer interactions (client communication) to resolve payment disputes and streamline the billing process, contributing to a 50% improvement in the collection rate of late receivables.
- Collaborated with the accounting team (team collaboration) to refine monthly cash flow forecasts and improve operational reporting.

PROJECT & CERTIFICATIONS

- **Python project:** Developed a Python-based derivatives pricing application for European, American, and exotic options via Black Scholes, Cox-Ross-Rubinstein and Monte Carlo, including greeks and implied volatility modelling. The application features real-time market data retrieval, volatility forecasting, and comprehensive testing.
- **Yale University Financial Markets** with Honors.

SKILLS

- **Languages**: **French**, **English** (TOEIC C1: 960/990), **Spanish** (intermediate).
- **Skills**: Stress Management, Responsiveness, Teamwork, Autonomy, Curiosity, Results driven, Office 365 (Word, PowerPoint, Excel).
- **Programming:** Python, SQL, VBA, Google Cloud.

ACTIVITIES & INTERESTS

- **Volunteering** at the CSE Lyon for 2 years: organisation of fundraisers and food for students in difficulty (more than 10,000 € raised and 1.5 tons of food collected).
- **Gymnast** at the Le Cran de Tassin club for 12 years: participating to 120 competitions and 2 French championships.
- **Interests**: Motor sports (Formula 1, Endurance, MotoGP), geopolitics, computer science and hardware.
- **Travel:** Italy, Greece, Turkey, Spain, China, United Kingdom.
